Technical data Multi-turn gearboxes

General information
 Bevel gearboxes for motor or manual operation of valves (e.g. gate valves and globe valves).

Notes on tables on pages 1 + 2

1) Factor	Conversion factor from output torque to input torque to determine the actuator size For new gearboxes, input torques increased by 15 % are required due to lower efficiency.
2) Input shaft	Depending on the required input torque
3) Weight	Specified weight includes output drive sleeve (without bore) and grease filling in the gear housing
4) Max. valve torque for modulating torque	Modulating torque = permissible, average torque for modulating duty
5) Special reduction ratio	On request
6) Multi-turn actuator flange	Standard flange according to EN ISO 5210

Features and functions

Type of duty	<ul style="list-style-type: none"> Short-time duty S2 - 15 min (open-close duty) Intermittent duty S4 - 25 % (modulating duty)
Direction of rotation	Standard: Clockwise rotation at input shaft results in clockwise rotation at output drive
	Options: <ul style="list-style-type: none"> GK 10.2 – GK 25.2: Reversal of direction of rotation by GW 14.1 reversing gearbox GK 30.2 – GK 40.2: Counterclockwise rotation possible as an alternative
Stages	Single stage: GK 10.2 – GK 25.2
	Double stage: GK 30.2 – GK 40.2
Input shaft	Input shaft made of stainless steel
	Standard: Cylindrical with parallel key according to DIN 6885-1 (refer to table on page 1)
	Option: Square: <ul style="list-style-type: none"> conical (DIN 3233) cylindrical
	With respect to size, please contact AUMA

Operation

Motor operation	<ul style="list-style-type: none"> With electric multi-turn actuator (maximum permissible input speed: 240 rpm) Input mounting flanges for multi-turn actuator (refer to table page 2)

Technical data Multi-turn gearboxes

Power tool emergency operation (input shaft with square)	Maximum permissible input speed: 240 rpm
--	--

Valve attachment	
Valve attachment	A, B1, B2, B3, B4 according to EN ISO 5210 A, B, D, E according to DIN 3210 C according to DIN 3338 Special valve attachments: AF, AK, AG, IB1, IB3, IB4

Service conditions	
Mounting position	Any position
Ambient temperature	Standard: -40 °C to +80 °C
	Options: -60 °C to +60 °C 0 °C to +120 °C
Enclosure protection according to EN 60529	IP68
	According to AUMA definition, enclosure protection IP68 meets the following requirements: <ul style="list-style-type: none"> • Depth of water: maximum 8 m head of water • Duration of continuous immersion in water: Max. 96 hours • Up to 10 operations during continuous immersion • Modulating duty is not possible during continuous immersion
Corrosion protection	Standard: KS Suitable for use in areas with high salinity, almost permanent condensation, and high pollution.
	Option: KX Suitable for use in areas with extremely high salinity, permanent condensation, and high pollution.
Coating	Double layer powder coating Two-component iron-mica combination
Colour	Standard: AUMA silver-grey (similar to RAL 7037)
	Option: Available colours on request
Lifetime	AUMA multi-turn gearboxes meet or exceed the lifetime requirements of EN 15714-2. Detailed information can be provided on request.

Accessories	
Reversing gearboxes	<ul style="list-style-type: none"> • GW reversing gearbox for reversal of rotation direction for manual and motor operation

Special features for use in potentially explosive atmospheres																												
Explosion protection in accordance with ATEX 2014/34/EU	Standard: II2G c IIC T4 II2D c T130 °C																											
	Options: II2G c IIC T3 II2D c T190 °C IM2 c																											
Type of duty	Open-close duty: Short-time duty S2 - 15 min with the following average output torques:
